### PennDOT District 6 Regional Traffic Management Center

**Location:**

King of Prussia, PA

**H&K Company:**

Structures Division

**Client:**

Heim Construction

**Owner:**

Pennsylvania Department of Transportation

**Services Included:**

- Gravix Retaining Wall

**Additional Project Features:**

- 4,038 SF of Wall Area
- 255 LF of Barrier

**Project Description:**

The new PennDOT District 6 Regional Traffic Management Center will expand the existing RTMC's capabilities by providing a larger and more modern facility for the management of PennDOT's Intelligent Transportation Systems (ITS).

The Gravix precast wall system was installed to expand the facilities upper parking lot and to provide an additional parking lot on the lower level. The wall was cast by our precast division, Atlantic American Precast, located in Douglassville, PA. The architectural finish on the wall was Minnesota Ashlar. The wall was stained to match the finish the façade of the new parking garage and building.
